COLOR TEMPERATURES & ADJUSTABLE GIMBALS

Match your mood with your lighting by switching between **3 color temperatures**: 2700K, 3000K, and 4000K. All are 90+ CRI for accurate color rendering when compared to natural light. Set the mood when entertaining with a warmer light or brighten the area for a clearer task area. Also, the 3K has a **patented gimbal** designed to allow light to be directed as well as a **patented LED strip** for even light distribution to eliminate hot spots.

Links up to 750 watts on single power

1" Thick

No Hot Spots

Patented Gimbal rotates 120° to direct light
